REPORT OF THE

BOARD OF EDUCATION.

We herewith present to the district our annual report:

We feel that the past year has been one of progress and development in the schools. Suggestions emanating from the state superintendent of public instruction relative to a program of studies for public schools have been acted upon, and to a large degree carried out, to the advantage of our school.

The village schools have been placed upon a regular class gradation and this has been helpful to both teachers and pupils, and if carried forward and perfected will bring the schools up to a much higher standard of efficiency. Where necessary new and up to date text-books have been introduced, also a beginning has been made in building up a school library of supplementary books for reference. The outlying schools have also received proper attention and on the whole much progress has been made.

The failure of parents and guardians to assist us in our efforts to enforce the truancy laws has been a source of constant annoyance; also we regret the lack of interest in the public schools as shown by the large number of parents who neither visit the schools nor attend the school meetings. More interest along these lines would encourage the school board in its efforts to place the schools upon a better working basis.
